Expensify

ORACLE NetSuite

Easily integrate with *NetSuite*

Learn more about our **NetSuite** integration.

Bidirectional sync
Connect Expensify to NetSuite for an automatic data sync between platforms.

Easy expense coding
Import your NetSuite categories, customers, departments, and more.

Corporate card reconciliation
Expensify automatically syncs card transactions to receipts, making it easier to monitor and reconcile spending.

Global support
Centrally manage entities, local tax, and currency conversion at scale with our OneWorld integration.

Custom export options
Export out-of-pocket expenses as checks, vendor bills, or journal entries. Export company cards as debit cards, credit cards, or vendor bills.

Full mobile control
Manage every NetSuite integration setting from the Expensify mobile app, no computer required.
