

Easily integrate with *Sage Intacct*

Learn more about our
Sage Intacct integration.

Bidirectional sync

Connect Expensify to Sage Intacct for an automatic data sync between platforms.

Easy expense coding

Automatically import your Sage Intacct classes, departments, projects, UDDs, and more.

Corporate card reconciliation

Expensify automatically syncs card transactions to receipts, making reconciliation a breeze.

Native tax tracking

Expensify pulls your VAT and GST tax codes from each Sage Intacct entity and applies them automatically.

Custom export options

Export out-of-pocket expenses as vendor bills. Export company cards as expense reports, vendor bills, or credit card transactions.

Full mobile control

Manage every Sage Intacct integration setting from the Expensify mobile app, no computer required.
