Seamlessly *integrate* Expensify with Xero.

Cut through the clutter with Expensify's Xero expense management integration — a one-stop shop for streamlined expense reporting and financial management.

Scan the QR to see all the details of the Expensify's Xero integration.

Exact expense coding

Expensify's Xero integration pulls in all existing chart of accounts and tracking categories from Xero into Expensify, reducing the risk of errors from manual data transfer.

Enable tax tracking

The tax rates set up in Xero will be automatically imported into Expensify as Taxes. You can set a default rate for your workspace currency versus any foreign currencies, and set specific tax treatments for each expense category.

Auto-sync for realtime visibility

No need to provision two systems. Expensify's auto-sync updates any changes to your Chart of Accounts, Tracking Categories, Customer Contacts & Tax Rates immediately.

Auto-reconcile Expensify Card transactions

In one automatic sync, Expensify will create the liability account and Journal Entry to balance out the payment of your monthly transactions, saving admins hours reconciling their statements.

Direct corporate card integrations

Expensify has native integrations with all major corporate card providers. Transactions are downloaded directly into member accounts and auto-matched to their corresponding receipt images.
